

SECRET
SECURITY INFORMATION

Assistant Director for Operations

7 October 1953

Acting Chief, FBID

Progress Report for September 1953.

ADMINISTRATION

1. The main operations building of the Santa Rosa station is 15 percent complete and antennae work is 20 percent complete. The auxiliary building which is 95 percent complete is now being used for office and storage purposes. Teletype communications between Santa Rosa, Washington and Reseda were established on 23 September on an eight hour daily basis. The circuit will ultimately carry the file of the West Coast Bureau.

2. The [] project in Okinawa has not yet received final approval by the Secretary of Defense. The Air Force now plans construction by troop labor rather than contract, with less urgency than previously contemplated. The field will remain non-operational in peacetime. Air Force representatives have been advised that relocation of the FBIS station will be necessary regardless of the operational or non-operational character of the installation so long as an air strip is to be constructed across the present FBIS antennae field.

50X1

3. All sixteen of the new FBIS houses in Okinawa were accepted from the contractor and furnished. The houses are now being occupied. It is estimated that the Club-Shelter-BOQ structure will be completed by the end of October.

4. Private construction of 310 additional houses during the next six months in the immediate vicinity of the West Coast Bureau at Reseda will cause possible reception interference during the remaining tenure of the bureau at its present location. The builder has indicated unwillingness and opposition to the installation of filters and bonding systems in the houses to minimize interference. Some protection may be gained as a result of a letter addressed to the Federal Housing Administration in Los Angeles by the Chief, West Coast Bureau which points out disadvantages to the Government in providing Federal loans to prospective purchasers of these houses. Other than the foregoing it is not feasible to oppose the builder. Such interference as may be experienced will be worked out individually with the occupants of the houses. The earliest activation of the Santa Rosa station without awaiting completion of all electronic installation is planned.

SECRET

5. The recent typhoon in China and earthquake in Cyprus left IED installations on these islands virtually unaffected.

6. Full time Agency sponsored training at the Russian Institute, Columbia University, was approved by the Acting DCM for [redacted] Chief, East Coast Bureau.

50X1
50X1

7. Messrs. Hamilton and Perry of the Bureau of the Budget were oriented in IED departmental and field bureau operations in the course of their visits to IED Headquarters and East Coast Bureau on 11 and 14 September.

8. IED progressed with the help of the Logistics Office in arranging independent logistical support for the Tokyo, Hokkaido and Okinawa Bureaus, following exclusion of IED from the benefits of such support under the newly issued GMP 53. To date the Office of the Chief of Staff, IEDP has authorized such support for the Okinawa Bureau and the Office of the Assistant Chief of Staff, G-2, Army has authorized such support for the Tokyo and Hokkaido Bureaus.

9. Personnel:

a. During the month two persons entered on duty with IED and four were terminated, reducing the on-duty figure to three below the authorized IED ceiling. Seventeen applicants are in process.

b. The Chief, Okinawa Bureau completed a successful recruiting trip to Hong Kong, Bangkok, Rangoon and Saigon. Three Russian monitors for the Hokkaido Bureau and two Chinese monitors for the Okinawa Bureau were employed.

c. As a temporary expedient two Russian language military personnel were attached on 30 days T&M by G-2, Far East Command to the Hokkaido Bureau for monitoring work. It is planned not to request extension of their assignments.

OPERATIONS

10. IED is filing a daily wire to the U. S. representatives at the United Nations General Assembly session, consisting of a concise 500 word daily average of foreign radio reaction to UN proceedings, in accordance with a format tentatively arrived at after preliminary conversations and correspondence with State Department officials. In addition the teletype link between WSA and the US Delegation office in New York was re-established for transmission of the entire IED "A" wire.

11. Reduction in size of the Latin American Daily Report resulted in a request from SA, Department of State for restoration of as much of the curtailed report as can be provided within budgetary and staff limitations. The report, which had been cut to approximately three pages, has been expanded to approximately ten pages daily. Further study of

Latin America coverage is in progress.

SECURITY INFORMATION

12. A conference was held in the office of the Assistant Director for Operations with Mr. Jun Murai, Chief of the Cabinet Research Chamber of the Japanese Government. FBIS views on FBIS-Japanese joint monitoring were presented.

13. FBID arranged with FEAF at Migata to procure necessary technical data from Japanese sources concerning power lines in the area of the proposed Northern Japan station. Chief, Tokyo Bureau has also been directed to secure cost information. Recommendations will be submitted upon receipt of this information. The Air Force has cancelled a planned expansion of the Migata air field, which will permit somewhat more favorable location of the station and antennae.

14. At the request of the PP Staff, tape recordings of one week's broadcasts from the Spanish National Radio in Madrid in seven Orbit languages were furnished by the East Coast Bureau.

15. A comprehensive list of all stations in the six megacycle band heard and monitored during the period October 1952 through March 1953 was furnished the Federal Communications Commission at their request, in connection with a request received by FCC for authorization for operation of Mississippi River waterways traffic communications circuits on this band.

16. O/C has advised that negotiations in London with the U. S. Air Attache for teleconference facilities between FBID Washington and the London Bureau were unsuccessful because inadequate line time is available to the attache for existing commitments. O/C is presently studying an alternate FBID proposal for increasing classified communications with London Bureau.

17. The CIA working group in which FBID participated has completed its preparation of a plan for a file of all foreign radio frequency usage requested by the National Security Council. The plan recognizes the value of a centralized foreign radio frequency usage file to FBID, and places firm emphasis on monitoring as the most profitable source of this type of information. The working group's report will be submitted to NSC during October.

18. Arrangements were made through Chief, Tokyo Bureau for elimination of interferences to coverage in Hokkaido caused by stations in a FEAF weather net.

19. In coordination with PP Staff and USIA, FBID concurred in the testing of the VOA Okinawa transmitter in daytime operation at megawatt power. Tests were initiated on 17 September. Preliminary reports indicate little if any interference to reception of broadcasts monitored by FBIS.

20. The "Intelligence Problem Series" of Radio Propaganda Reports was continued, with studies on potential problems for the Korean Political Conference and of the partial abandonment of Soviet propaganda on the "Great Stalin Projects." The "Vulnerabilities Series" of Radio Propaganda Reports, designed to service primarily the needs of psychological

SECRET

operations, was initiated in a review of popular disaffection in Czechoslovakia. A "Spot Report" series was also initiated with the publication of a comparison of current North Korean liberation slogans with those of last year. This series is intended to provide immediate background on current propaganda developments.

Daily reviews of USSR, Satellite and German broadcasts are delivered to local users in London and sent by wire to consumers in Western Europe; to American Embassy offices in London; Paris and The Hague; [redacted] G-2 EUCOM; G-2 Frankfurt; North Atlantic Treaty Organization; and SHAPE. A 20,000 word selection from Soviet and Satellite broadcasts monitored at London and the Mediterranean Bureau is transmitted daily by wire from London to the Munich studios of the Voice of America and to the German Bureau for transmittal to the 7997th Composite Group, Frankfurt Military Post and other local consumers.

50X1
50X1**German Bureau**

All processed material is filed to HICOG in Bonn and Frankfurt and to the 7997th Composite Group, Frankfurt Military Post. Radio Volga broadcasts are relayed to the Munich studios of the Voice of America.

Austrian Bureau

All processed material is filed to Public Affairs Division, USCOA, Salzburg. From this office it is distributed to G-2, USAF, and the US Consulate in Salzburg. The complete file is also relayed to the Public Information Division, Headquarters, USAF, Salzburg; the Daily Press Review is supplied to the Political Division, US Embassy, Vienna, and the monthly Economic Report to the Reports and Statistical Branch, US Special Mission for Economic Cooperation, Vienna.

Mediterranean Bureau

Soviet-Kurdish language intercepts are airmailed to the American Embassies in Baghdad and Teheran. Summaries of Soviet-Kurdish language broadcasts and processed Arabic material from Iraq, Jordan, Egypt and Syria are sent to the American Embassy, Baghdad. Selected Balkan material is airmailed to the American Embassy in Athens. Processed items relating to Cyprus are sent to the Colonial Secretary in Nicosia. A copy of all broadcast intercepts originating from or directed to Iran is delivered to the Defense Security Officer of Cyprus.

Osaka Bureau

All processed intercepts are filed to Tokyo for FEC staff sections. All Korean material is filed to the US Embassy, Pusan.

CONFIDENTIAL

CONFIDENTIAL
SECURITY INFORMATION

Selected items on Communist China home, regional and numeral code broadcasts are filed to Saigon for the French Monitoring Service. All Chinese Communist material is filed to USIA, Taipei. Selected Peking material is sent to Hqrs, 5th Air Force, Tokyo. All South Korean intercepts are sent to G-2, Eighth Army and FEAF. Weekly analyses of Communist China international and regional broadcasts are filed to FEC, Tokyo. Logo of Vietnam News Agency (Ho Government) and GIM (unidentified Communist station) items, and all Cao Dai National Resistance Front material are transmitted to FBIS, Saigon, for local dissemination. Selected Pyongyang, Peking and Vietnam material is transmitted to G-2 Ryukyus Command. The World Health Organization Epidemiological Bulletin is transmitted to FEAF, Tokyo weekly. UN programs beamed to Korea and China are reported once a month to FEC and FEAF, Tokyo. Daily reports on the behavior of the Republic of Korea and Voice of United Nations radios are filed to FEC, Tokyo.

Saigon Bureau

All processed material is filed to FEC, Tokyo and furnished the American Embassies in Saigon and Phnom Penh, USIA Saigon, and the Army Attache in Saigon. Selected material is furnished the Foreign Operations Administration Information Division, the Military Assistance Advisory Group and the American Embassy in Saigon.

Tokyo Bureau

All processed intercepts are sent to staff sections of FEC. All Japanese and Mongolian material from Peking, and Korean and Mandarin material from Moscow is furnished Far East Air Force. Korean material is filed to the Eighth Army and the American Embassy in Pusan. Selected material is furnished Civil Information and Education Section, US Civil Administration, Ryukyus. UN programs beamed to Korea and China are reported once a month to FEC and FEAF, Tokyo. Selected Chinese International Service material is filed to USIA, Formosa. All material monitored in Japanese is furnished the American Embassy in Tokyo.

Hokkaido Bureau

All processed intercepts are furnished Headquarters, FEC and FEAF in Tokyo, and G-2 1st Cavalry Division, Camp Crawford. Weather reports from USSR regional coverage are furnished Field Research Unit, FEC. All summaries of Ulan Bator Russian Broadcasts are furnished Documents Research Section, FEC. Bolt recordings of selected Russian regional broadcasts are made and delivered to FEC, Tokyo.

West Coast Bureau

Selected material is filed to FEC and FEAF, Tokyo. The entire PAWSIA file intercepted at the West Coast Bureau is teletyped to FEAF, Tokyo.

East Coast Bureau

Daily distribution of an epidemiological bulletin of the World Health Organisation is made to OSI.
